Milfoil Solution®: A natural control for invasive Eurasian watermilfoil

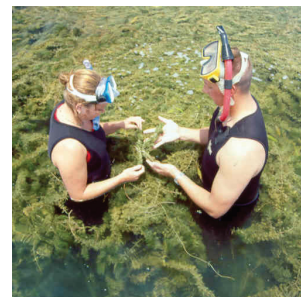

EnviroScience, Inc employs the only team of biologists experienced in managing Eurasian watermilfoil infestations using the native milfoil weevil. Additionally, our experts deliver quality customer service and guarantee personal attention throughout each milfoil management program. Below is a list of gracious references that have agreed to share their success stories with you.

MILFOIL SOLUTION® SUCCESS STORIES

LAKE	WEEVILS	CONTACT	YEAR
Cedarville Bay, MI	15,500	Bob Smith - 906-484-4081	2007-2008

"I can't say enough about the fantastic relationship we have with EnviroScience. They have been great to deal with not only coming up with innovative ways to help fund this project but also helping us in knowing what we can do in the future to keep good control of the health of our lake, which is very important."

John Bawol, Lake St. Helen, MI

"As President of The Scugog Lake Stewards, a 17,000-acre lake in Southern Ontario, my experience with milfoil weevils and EnviroScience Inc. has been extremely positive. The staff is both knowledgeable and an absolute pleasure to work with. I believe that weevils hold a great deal of promise for the many large Ontario lakes and waterways dealing with Eurasian watermilfoil."

Jamie Ross, President, Scugog Lake Stewards
